The disclosure is objected to because of the following informalities: it appears that "54" (page 15, line 11) is incorrect. Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For clarity and/or definiteness, it appears that –radially—should be inserted before "inward" (claim 2, line 2; claim 5), that –in a peripheral direction – should be inserted after "groove" (claim 9, last line), that –wall—should be inserted after "tubular" (claim 10, line 5) to provide antecedent basis.

The following are not clear: "concavo-convexly" (claim 10)

All claims should be revised carefully to correct all other deficiencies similar to the ones noted above.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3654

Claims 10 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Morita (US-6680818). Note the engaging portion 27, braking member 4 with tubular wall portion 44, releasing member 63, and guide wall portion 21. Note the "concavo-convexly" form as shown in figs. 3, 11, 13, 17, 19, 23, 25, 29, and 31.

Claims 1-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
